

The Dose

The Merrick Group, Inc.

DECEMBER
2021

It's that time of year when you can
toss all the stress away & enjoy time
with family and friends!!

Merry Christmas to the most awesome
employees in the industry!!

Thank you all for another
successful year!!

All information for
the Spring Season will
be communicated
after the first of the
year. Please be sure
to check your email
regularly. If you
know anyone
interested in joining
the Merrick Group,
please send resumes
to Stephanie & be
sure to complete
referral paperwork.

Email:

sprobert@mginc.net

The office will be
closed
December 24th
through
January 2nd

**LOOKING FOR A WAY TO
GIVE BACK THIS
HOLIDAY SEASON??**

Drop off or ship a toy to the
Hazleton office for a child in
need this Christmas!!

Donations will be
accepted through
Dec. 16th

MENTORING

A mentor at work is someone you are able to seek guidance or expertise from.

Understanding your role can sometimes be difficult but speaking with someone who has been in your shoes many times can help you feel more comfortable.

REMEMBER

STOP WHEN UNSURE & USE A QUESTIONING ATTITUDE

The pre-job brief is designed to go over any questions individuals may have before going to work, but do not hesitate to ask questions in the field.

When people with less experience are trained by mentors and given guidance, there is less chance of injury.

Experienced individuals must be willing to step up and talk to lesser experienced individuals in order to help them succeed.

Productivity goes up when a new employee understands how to properly perform their work & feels confident.

If you are newer to nuclear or Merrick and need help, please never hesitate to ask your leaders. If you are unsure who would be the best person to talk with, consult with your Project Manager and they can direct you to the right person!! We want everyone to succeed and that begins with everyone wanting to do their best... remember to be coachable because we are all looking to complete the work safe and on time so we can go home to our families & loved ones.

ONE
team
ONE
dream

GET TO KNOW...

OCONEE NUCLEAR STATION

Location: Lake Keowee
(Seneca, SC)

Number of Units: 3

Commissioned: 1973-1974

Reactor Type: PWR

Oconee is unique as it is the only nuclear power plant in the United States that does not rely on emergency diesel generator sets for emergency power. Instead, it relies on two hydroelectric units at the nearby Keowee hydroelectric station.

Merrick sent an unprecedented 131 people to Oconee this Fall between Maintenance and Eddy Current!!

WATTS BAR COOLING TOWER

SHOUT OUT

“As always David you and your guys never disappoint. Thanks for another great job!”

DAVID PRICE

**Maintenance Supervisor
Watts Bar**

“We appreciate the efforts of everyone involved in helping to restore critical margin to our cooling tower. Also, thank you for the focus on safety and quality!”

DUSTY RHOADES

**Maintenance Superintendent
Watts Bar**

SHOUT OUT

“Thank you for all of
the work you and your
crew SAFELY performed
this outage!”

JACK TURPIN

Oconee ECT Oversight

SHOUT OUT

“On behalf of
the Mechanical
maintenance
group here at
Comanche Peak,
Thank you to all
Merrick
employees for
another great
performance
during our 2RF19
outage. We look
forward to
seeing you again
in the spring
2022. Safe
travels and
Happy Holidays.”
