The Dose

The Merrick Group, Inc.

November 2026

As Thanksgiving approaches, we want to say thank you. This season reminds us to appreciate not only our shared successes, but the people who make them happen. Your hard work, time, and teamwork mean a lot to us. Whether you work in the office, out in the field, or remotely, your efforts help us move forward and grow every day. We hope you take this time to relax and enjoy the holiday with your family and friends.
Happy Thanksgiving!

Where are we going this month?

Comanche

Brunner Island

Oconee

SSES

Watts Bar

Montour

Our annual Toys For Tots campaign has already started! We will be collecting unwrapped toy donations at our Hazleton office until Thursday, November 19th. Help us bring smiles and joy to children in need this Christmas!

If you'd like to contribute and aren't near the office, Venmo @TheMerrickGroup or scan the QR code to donate, and we will do the shopping for you!

venmo

STOP WORK CRITERIA

Once you arrive to work for the day and complete the crew DLAP, you break off into teams. This is when you complete a Pre-Job Brief and Clearance Brief. Next you sign on to the clearance and head into the field. So, when should you STOP work in the field???

- Unsafe conditions, change in conditions, or clearance is not adequate
- Component or work area not found in expected condition
- Cannot perform procedure as written or you feel you are not qualified to perform the task
- Plan is inadequate, prints don't match component, plan doesn't match conditions
- Unable to verify ID tags or labeling is confusing and needs clarification
- Change in radiological conditions or unexpected conditions
- Loss of FME Integrity
- Any time you feel unsure of how to proceed

WHAT DO YOU DO AFTER YOU STOP WORK???

NOTIFY SUPERVISION → PLACE EQUIP IN SAFE POSITION → DEVELOP A NEW PLAN → MAKE SURE YOUR SUPERVISOR APPROVES OF THE NEW PLAN → RESUME WORK

Happy Veterans Day! We honor all who have served and proudly thank the veterans of the Merrick Group. Thank you for your service, sacrifice, and unwavering commitment to our nation.

"I can't thank your guys/gals enough for all their hard work this outage both HX and ECT! I appreciate the flexibility and drive to get the job done safely and efficiently. Huge shout out to Keith Owensby he was a huge help to me during my first outage with Duke! I look forward to working with you all more in the future. Wish you the best in your next endeavor!"
